Relevant Experience

Senior Frontend Developer · **Massimo Dutti** Feb 2024 — Present

- Build & style high quality features for Massimo Dutti Ecommerce using the latest functionalities of Angular framework, TypeScript, SCSS, etc.
- Work alongside product & project managers, designers, and other engineers to transform creative concepts into refined digital experiences.
- Work in team with other engineers to identify and resolve technical debt to improve and make the project more scalable, always following the premise of improving performance and the developer experience.
- Leading initiatives in the team, such as creating documentation, facilitating knowledge, peer programming, etc.

Senior Frontend Developer · **Ultra** Mar 2023 — Feb 2024

- Work with other engineers to develop and complete Ultra's NFT marketplace, ensuring the quality and functionality of the final product, improving the user experience and stability of the platform using Angular, TypeScript, SCSS, etc.
- Actively participate in an agile environment using Scrum, contributing to the planning, execution and review of sprints with deliverables every 2 weeks.
- Implemented modular and scalable components, facilitating their reuse across multiple parts of the project.
- Contribute to the creation and maintenance of technical documentation, providing clear and concise guidelines for the use and development of the Marketplace's components and functionality.

Frontend Developer · **Wabi** Feb 2022 — Mar 2023

- Participation in the development and maintenance of a backoffice system and a B2B marketplace for Coca Cola's suppliers and customers, ensuring the efficiency and functionality of the platforms using Angular, TypeScript, CSS, etc.
- Responsible for upgrading the project to the latest versions of Angular, ensuring compatibility and taking advantage of the performance and security improvements offered by the new versions.
- Working closely with the Product Owner and development team on task refinement, ensuring a clear understanding of business requirements and objectives.

Frontend Developer · **Massimo Dutti** Sep 2018 — Feb 2022

- Active participation in the migration of an application from AngularJS to Angular, ensuring a smooth transition and minimising service interruptions.
- Collaboration in the creation of a content management system (CMS) used by various Inditex brands, including Massimo Dutti, Zara, Pull&Bear, among others.

Frontend Developer · **Hospital Privado** June 2016 — Aug 2018

- Participation in the creation of the new system for managing and assigning patient appointments. Implementation of key functionalities for booking, modification and cancellation of appointments using Angular & Typescript as main stack.

Full Stack Developer · **Sooft Technology** May 2014 — June 2016

- Participation in the creation of a new product with national expansion using C#, MVC, SQL Server, Apache Cordova, JQuery, HTML, TFS.
